```java
import java.util.Scanner;

public class cAT {
    public static void main  (String[]args) {
    Scanner c=new Scanner(System.in);
    int n=c.nextInt();
    int i=1;
    do {
        System.out.println(2*i);
        i++;
    }
    while (i<n+1);

    }

}
```

```java
import java.util.Scanner;

public class cAT {
    public static void main  (String[]args) {
    Scanner c=new Scanner(System.in);
    double n=c.nextInt();
    double i=1,s=0;
    do {
        s=s+Math.pow(i,2);
        i++;}
    while (i<=n);
    System.out.println(s);
    }

}
```

```java
public class cAT {
    public static void main  (String[]args) {
        int i=1;
        do {
            int j=1;
            do { System.out.printf("%5d",j);++j;}
            while (j<=i);
            System.out.println();
            i++;}
        while (i<=5);
        }
    }
```
